

## Join the CRISP Registry

### What is CRISP Registry?

The CRISP Registry is a U.S.-based multicenter clinical registry supporting pediatric and congenital cardiac catheterization laboratories. It provides robust tools for quality assurance and improvement (QA/QI) and fosters collaborative research among participating centers. The registry is actively expanding and aims to reach approximately **40 institutions** nationwide by the end of 2025.

### Benefits of participation include:

- Access to QA/QI benchmarking tools
- Engagement in multicenter collaborative research
- Real-world data collection and comparative analytics
- Inclusion in evolving device-specific registry modules such as Occlutech ASD module and more to come
